

SOUTH DEFIANCE STREET & MILLER AVENUE WATERLINE
CONTRACT 9-19

A new 12" water main will be installed along the east side of S. Defiance Street from Miller Avenue to the south driveway of the Terry Henricks used car lot. In 2004, new 12" water mains were installed at the S. Defiance Street intersections with Miller Avenue, Willow Way, Hawthorn Drive, and the south driveway of the Terry Henricks used car lot. The new water main will abandon the remaining sections of old 10" cast iron water mains between each of the above mentioned intersections. Houses on the east side will receive a new water service to the east line of the 20' permanent waterline easement. Houses and businesses on the west side will be reconnected to the new water main.

A new 12" water main will also be installed on the north side of Miller Avenue from Pin Oak Place to the east corporation line. This new water main will replace a 10" ductile iron water main that was installed in 1979. Houses will be reconnected to the new water main.

Preliminary Engineer's Estimate Of Construction: \$305,000.00
